PROJECTS

Artis IQ
* Actively engaged in the development of Artis IQ, the first truly contact-less cannabis point-of-sale system. he project required a deep understanding and integration of various functionalities including inventory management, identity verification, digital payments, promotional features, and rewards system.
* Designed and implemented responsive UI components that enhanced the user experience, making the system accessible and easy to navigate for users on various devices.
* Adjusted and customized the interface based on client feedback, ensuring that the final product alignedwith their vision and expectations for a contact-less cannabis point-of-sale system.

Vendorfied
* The website "Vendorfied" offers a subscription-based solution designed to make the vendor onboarding process more efficient and secure. The platform aims to handle all the paperwork involved, allowing businesses to focus on their core operations.
* Developed responsive design elements to facilitate easy navigation and access to platform features, enhancing the efficiency of the vendor onboarding process for subscribers.
* Collaborated with the back-end development team to ensure the secure transmission and storage of user data and documents. Contributed to the development of front-end elements designed to enhance platform security, providing subscribers with confidence in the protection of their sensitive information.

Adventure Aid
* As the Team Lead, oversaw the entire development lifecycle of the AdventureAid Project, ensuring the project met its milestones and deliverables on time. Provided guidance, support, and direction to a multidisciplinary team of developers
* Supervised the integration of key features such as hotel booking, flight reservations, car rentals, and vacation packages. Worked closely with the team to implement user-friendly interfaces and functionalities that simplified the travel planning and booking process for users.
* Ensured data security with best practices and robust protections.

NexRage Studios Website
* Actively involved in implementing the user interface and experience for the NexRage Studios website. Worked closely with UX/UI designers to translate their designs into a functional and responsive user interface, ensuring consistency and accessibility across various devices and browsers.
